INTRODACTION

Educational games are those designed to teach people about a specific subject or a specific skill. They are made predominantly for kids and students of all ages, and can be used both inside the classroom and out. Educational games are a subset of serious gaming.

Benefits of Educational Games

There are many benefits to using educational games and you might find that your child plays lots of them at school - they may come home and tell you they've been playing games in class, without realising they have been learning at the same time! Many games can be adapted to a particular topic or skill so that you can work on targeting specific areas with your child.

Benefits of educational games include:

- They allow children to engage with subject matter and become familiar with it - for example, playing games with questions about general knowledge or key topics. This allows them to retain the information and recall it more effectively.
- Children can work on key skills, for example number bonds (addition and subtraction) in games which require the player to add up (or take away) scores.
- Children often don't realise that they are learning while they are playing because they just see it as part of the game.
- More complex game-play will involve more intricate problem-solving skills, which will develop children's confidence and independence, while helping them face and solve a wider range of problems as they mature.
- Children will develop their teamwork and social skills while playing games because many games require collaboration and turn-taking. They will also learn to lose and become resilient, driving them to think about their game-play and make adjustments the next time to become more successful.
- You will probably have more success at enticing and enthusing your child to play a game than testing them on what they know or can do.

CARD GAME

The attached game is a card game designed to be a tool during history classes.

The game is divided into several topics (200ty different topics) from the field of history and is suitable for students aged 12 to 16 years.

How to prepare this game yourself?

1. First, choose a topic or unit of study for which you want to prepare the card game.
2. Find two pictures from the Internet that are related to the topic and under the pictures write a task in the form of an activity (ex. presentation, mini-book, timeline, dictionary with terms, etc.)
3. In Publisher, make the cards in digital version and print them.
4. In the section "rules for the teacher", read how to use the moles during the lesson.

Rules for Teachers:

1. Choose history topic.
2. In the end of the lesson split the class in two groups.
3. Decide whether students should work in groups or individually.
4. Designate (assign) one leader to each of the groups.
5. Give each group one card to choose.
6. Discuss with the groups about their tasks (activities), card they choose.
7. Define the period for how long the task (activity) should be completed and when the presentation date will be.
8. Give feedback to the student or the group about the results achieved.

Rules for Students:

1. Do your task (activity) in a group or individually (follow the instructions from your teacher).
2. The leader leads the group, if working in a group.
3. Respect the allotted time delegated by the teacher.
4. Presenting the tasks in front of the class.

HOW TO PLAY?

- This game consists of 20 themes.
- Students are divided into groups.
- Each topic has five different questions that are answered in the first round.
- Students who answered the questions correctly go to the next round and have the opportunity to choose one of the given cards (for each topic there are two cards with different tasks)
- After the draw, they perform the assigned task and present it to the class. Depending on the attached, a winner is selected.

How to adapt this game for visual impaired students?

- Use Braille or large print: The deck of cards could be printed with Braille or large print so that visually impaired players can easily read the cards.
- Use tactile markers: To differentiate between cards, tactile markers such as bumps or notches could be added to the edges of the cards. This would allow players to feel the difference between cards without having to see them.
- Use contrasting colors: To make the cards more visible to players with partial vision, the deck could be printed with high-contrast colors.
- Use audio cues: To make the game accessible to players who are completely blind, audio cues could be added to the game. For example, a voice could announce each card as it is played or a device could beep to signal the end of the game.

How to adapt this game for students with intellectual disability?

- **Simplify the deck:** Instead of a standard deck of cards, use a deck with fewer and simply information.
- **Use visual aids:** To help players understand the game, use visual aids such as pictures of the cards, or draw the cards on a whiteboard or large piece of paper. This can help players who have difficulty with reading or understanding the cards.
- **Adjust the rules:** Simplify the rules of the game to make them easier to understand.
- **Provide support:** Provide extra support for players who need it, such as providing prompts or visual cues to help them remember the rules or the cards they have.
- **Encourage socialization:** Use the game as an opportunity to encourage socialization and communication. Players can practice asking and answering questions, taking turns, and sharing information about themselves.

How to adapt this game for hearing impairment students?

- **Use visual aids:** Instead of relying on verbal communication to explain the rules, use visual aids such as pictures or written instructions. This will help students with hearing impairments to understand the game better.
- **Provide written cues:** Provide written cues for each card or picture so that students can easily match the cards or pictures. For example, you could include the name of the person, place, or thing on each card or picture.
- **Use sign language:** Use sign language to communicate the rules of the game and to provide instructions to the students. You can also use sign language to communicate with the students during the game.
- **Use vibratory cues:** You can also use vibratory cues, such as tapping the table or shaking a bell, to signal the start and end of the game and to indicate when it's time to turn over a card or picture.
- **Encourage teamwork:** Encourage students to work together to help each other find matching pairs. This will help promote socialization and teamwork among the students.

How to adapt this game for students with dyslexia?

- **Use visual aids:** Use pictures or illustrations on the cards to help players identify the event or person in question. This will reduce the amount of reading required and make the game more accessible for dyslexic players.
- **Simplify the text:** Reduce the amount of text on the cards and use clear, easy-to-read fonts. Use bullet points or short sentences to describe the events or people on the cards.
- **Provide audio support:** Consider providing an audio recording of the events or people on the cards. This will allow dyslexic players to listen to the information instead of having to read it.
- **Use color coding:** Use different colors on the cards to represent different historical periods or categories. This will help dyslexic players quickly identify where the card should be placed on the timeline.

Create a mini book
with facts and im-
portant dates for the
American revolution

Create an American
Revolution interac-
tive timeline

**WHERE DID THE AMERICAN
REVOLUTION BEGIN?**

**WHEN DID THE AMERICAN
REVOLUTION END?**

WHO ARE PATRIOTS?
